**APPARATUS AND METHOD FOR RAPIDLY INCREASING POWER  
OUTPUT FROM A DIRECT OXIDATION FUEL CELL**

Examiner: Yuan

S.N. 09/881,489

Art Unit: 1745

January 27, 2003

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, drawn to a direct methanol fuel cell system, classified in class 429, subclass 23.
  - II. Claim 14, drawn to a method of rapidly increasing output power from a direct oxidation fuel cell, classified in class 429, subclass 13.

The inventions are distinct, each from the other because of the following reason:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In the instant case, the direct methanol fuel cell system can be operated without the sensing means, which detects a demand for output power.

3. If invention I is elected, an election of species is required. This application contains claims directed to the following patentably distinct species of the claimed invention.

I-1, Claims 1,3-8, drawn to a direct methanol fuel cell system comprising a conduit for delivering methanol to a flow field, a pump and a controller.

Art Unit: 1745

I-2, Claims 2,3-8, drawn to a direct methanol fuel cell system comprising a conduit for delivering methanol to an anode diffusion layer, a pump and a controller.

I-3, Claims 3-11, drawn to a direct methanol fuel cell system comprising an anode diffusion layer.

I-4, Claims 3-8,12,13 drawn to a direct methanol fuel cell system comprising a conduit for delivering methanol to an anode diffusion layer having apertures.

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 3-8 are generic.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
